**NEW** Z-RO

TEL : 21 438 929 WEBSITE [www.activesystemsmalta.com](http://www.activesystemsmalta.com)

The space saving **Z-RO** model is the brand new model used in households or small commercial applications. It is capable of a hefty 180L/day of purified water, with typically 90% less salts than incoming water

Built on the previous success of the **X-RO**, it carries the same benefits but utilizes a far cheaper non-branded pump, but retains the Filmtec® membrane offering maximum water quality. We have retained all the perfection of the components of the X-RO and are now more competitive. Moreover it is the neatest appliance one can have in the kitchen as the whole system is completely enclosed in its case.

#### SPECIFICATIONS

**Model :** Z-RO 50 & Z-RO 100  
180 l/day average ; 320L/day (XRO100)
